newsThe Euro-Arab Foundation meets in Granada its partners of the European project MI-ICT

09 May 2019

The Euro-Arab Foundation, as an active member of the MI-ICT [1] **project consortium, brought the other partners together at its headquarters in Granada last 6 and 7 May.**

The meeting, which was opened by the Executive Secretary of the Euro-Arab Foundation, Inmaculada Marrero, served to evaluate the activities carried out so far within the framework of the project, such as focus groups [2] or workshops.

- The **MI-ICT** [3] project, one of the four selected in its Horizon 2020 European programme call, aims to improve the integration of migrants and refugees into our societies through the development of ICT-based tools tools which facilitate their access to public services.

One of the key aspects of this project funded by the European Union's Framework Programme for Research and Innovation Horizon 2020, is the participation of research target groups -migrants, public sector and NGOs - in the design of these tools.

In this way, the project plans to customize the interfaces of access to key public services, so that they respond better to the needs of migrants and refugees.
