news15 Countries participate in the Training Course in Renewable Energies this week

25 Apr 2016

The Sixth Edition of the training courses in renewable energies titled <i>Smart Grids and the</i> Integration of RE Projects is held from 25 to 30 April in Granada. These training courses have been organized since 2010 by both the Euro-Arab Foundation and the League of Arab States. The courses impart theoretical and practical training, taking place this year in Granada, Malaga and				
Seville.

-- A moment during the inauguration. Order from left to right: Director of the Regional Center for Renewable Energy and Energy Efficiency (RCREEE), Maged Mahmoud; Director of the Energy Department at the League of Arab States, Jamila Matar; Executive Secretary of the Euro-Arab Foundation, Inmaculada Marrero Rocha; Representative of the United Nations Economic y Social Committee for Western Asia, Walid Al Deghaili; Department of Internationalization and Prospective of the Andalusian Energy Agency, Maria Luisa Borra.

As the combination of energies and renewable energies is gaining more weight and importance in Arab countries, the training course held at the Euro-Arab Foundation provides the necessary techniques needed for the implementation of strategies related to renewable energies that assist Arab countries in the development of their national action plans.

In this line, Jamila Matar, Director of the Energy Department at the League of Arab States, revealed during the inauguration the importance of the cooperation between the League of Arab States and its partners for those high-training activities.

Matar considers that "this training is an essential support in the transformation and renewal of traditional energy systems in Arab countries, as envisaged by the Arab strategy and national action plans in issues related to renewable energies in each of our countries".

As well, Maged Mahmoud, Director of the Regional Center for Renewable Energy and Energy Efficiency (RCREE), highlighted the importance of the training course in developing the knowledge and capacity of technicians and experts who are present during this week in Granada, especially in complicated and highly-specialized issues, as those imparted during the current edition which focuses on smart grids and the integration of RE projects. Mahmoud considers that "this activity is highly essential to meet future changes in energy integration in different countries. And so, I urge participants to make the best of this learning and discussion forum".

The Executive Secretary of the Euro-Arab Foundation, Inmaculada Marrero, believes that it is a challenge, as well as a satisfaction, to be able to continue offering those training courses in our country, in Granada: "An interesting as well as important training, due to

its highly-specialized theoretical and practical component which includes an academic program with technical visits to Siemens Control Centre in Seville and Smart City in Malaga".

The training course is organized by the Energy Department of the League of Arab States, the Euro-Arab Foundation, United Nations Economic and Social Committee for Western Asia (ESCWA), the Regional Center for Renewable Energy and Energy Efficiency (RECREE) and the German International Cooperation Agency (GIZ). Moreover, the event includes the participation of several other entities, as the National Renewable Energy Centre (CENER), the Regional Ministry of Development and Housing (AVRA), Andalusian Energy Agency, Catalonia

University of Granada, Solar Platform of Almeria, Malaga City Council, Endesa-Sma Siemens and Energy Meteo.
