The SAT-LAW project is funded by the European Commission through the Directorate General of Justice.

The **SAT-LAW** project focuses on the implementation of Directive 2104/41/EU on the European Criminal Investigation Mandate, which lays the foundations for a new system of judicial cooperation in criminal investigations in the EU based on the principle of mutual recognition.

Through the **Judicial Living Labs**, the questionnaires and research generated by the project will enable a six-monthly report based on Community cases on the application of Directive 2104/41/EU, based on qualitative and quantitative information, in particular on coherence, harmonisation and relations with other judicial instruments in order to harmonise judicial and police cooperation.
