## **newsProject: "Muslim and Arab World Knowledge: Knowing Is Caring"**

04 Dec 2019

This project consists of training workshops in schools, mutual knowledge encouragement and intercultural dialogue, focusing on young people and educators, in order to develop critical thinking and freethinking,

since young people are the future and it is necessary for them to create a more open society, in which cultural diversity is understood as a mutual enrichment, rather than as a cause of confrontation.
